About This Content

Return to where it all began! Flight simulation has been intertwined with the legendary Meigs Field for decades.

Few airports hold as much nostalgia, familiarity, and emotion for aviation enthusiasts. Located on the shores of Lake Michigan, Meigs Field operated as the gateway to corporate Chicago for over half a century. Now, twelve years after its closure, Merrill C. Meigs Field (KCGX) has been recreated by Orbx and IPACS with the utmost attention to detail and accuracy.

Depicted as it was in its final years, virtual pilots are welcomed to return to what was once the busiest single strip airport in the United States and enjoy it in high definition. Featuring a fully modeled terminal, highly detailed static aircraft, and other historically accurate elements, the airport has been brought back to life. In addition to the airfield itself, the city of Chicago waterfront and parks district have been included as well.

This special release for Aerofly by Orbx includes 12,000km2 of photoreal coverage, animated people and ferris wheel plus many other details to discover.

HUNTING SIMULATOR VR Is an ambitious game.

It tries really hard to work, but it doesn't.

PROS: Nice feeling guns Great main menu music Friendly developer

CONS: Animals don't react to player Player can climb walls with the teleport locomotion No way to change locomotion

Could I recommend this game in its current state? Sure, if you want to shoot goat props.

Do I want it to get better? Yes, definitely.. Bad game that barely gives you any indication of how it's meant to be played. Books fall down continuously in two columns on the screen, and you're supposed to click and drag them to sort them. It hardly ever works, and you often lose within the first few minutes of playing. Something more than a few second long video of someone playing to act as a tutorial would've been nice. Definitely pass.. 200 hours in and I'm still ready for more. It's not for everybody. But it's for me.. I'm lost and I have no idea where I am. And I have never had so much fun doing so.

So far, the greatest expansion to X Rebirth. New star systems, new challenges and tougher enemies. And that's only on the surface. There are new stations, ships and missions. Each mission is tougher and full of rewards.

The Toride System is massive and one can easily get lost. But that is not a terrible thing. You can explore for hours, battle Xenon ships, find hidden treasures and capture ships for yourself.

Cold Star, a system just as big as Toride, full of danger. But with danger, comes bigger rewards and resources for your massive empire.

And Finally, Home of Light. Compact, but just as large as the other systems. Full of stations selling massive qualities of materials. Take control of the market and earn big.

I'd highly recommend gettting the DLC.. A worthy sequel to Wild Animal Racing. After the first update I would like to dramatically change my review.

This game, while very basic, is surprisingly decent. Now that the puzzle like adventure mode is no longer required to unlock free mode this game has gone from disappointing to something worth getting for its' price.

The game is still rough around the edges, as expected of early releases. But if you want something to just play around with, you may enjoy this.. The Bridge crossing is the best chance for a turkey shoot in any campaign. 10V10 would annihilate a platoon of enemy tanks again.. Very fun UNTIL you run out of coal during the war, at which point NO ONE wants to sell any and unless you have a 2 billion dollar coushon your economy is going to tank, this was playing as mexico anyway, basically I've found that there is a lot of skipping to the next turn because you have to skew your build more towards economy than military or research, as far as the actual combat goes, eh not TOO exciting but it'll give you a kick the first few times, however Civ V has better looking combat but less realistic strategy so it's a horse a piece, also if you play as mexico... DO NOT ATTACK THE SMALL PEEPS. IDC HOW TEMPTING IT LOOKS DO NOT. YOU WILL RUIN THE REST OF THE GAME FOR YOURSELF.

Solid 7V 10. It's confusing at first. But it becomes amazing.

This game is great! I bought it on a whim to just be an early adopter for once. It's presented very well, the mechanics are great, it's challenging and replayable.

The sort of campaign mode that has robot NPCs with voice acting is fairly short as of now, but very enjoyable. I like the characters a lot and the maps are fun.

The arcade mode has more levels than campaign (I'm on level 27 so far). It consists of speedruns with different constraints. One type of level has hourglasses that you have to pick up in order to gain the fuel you need to reach the goal. These take place in cityscapes and building interiors. Then there are levels with a single supply of fuel where you just have to reach the end without dying. These take place in space in sort of abstract structures.

Both of these modes have leaderboards and have obstacles like bombs, lasers, and black holes. There is also a free flight mode, but it says "Coming Soon" when you click on it.

I think there is enough content in this game already to justify this price for early access. It's really fun. Here's hoping the devs stay dedicated to it and continue to add content and features.. First off I didnt think it was that bad especially for the price aswell the first 2 contracts where creepy in the russian bunker i think it was and the hospital i like them.

https:\/\youtu.be\/PD_CjOywszs. I'd score this between a 6.4...up to a 8.9

Which would of course be...on a scale of 1.002 to 11.822 (hopefully that's not convoluted at all...I strive for clarity through uniform grading systems)

Bottom Line...

Creative, stylistic time management\/card game (kind of a card game....you don't really draw cards as far as I can tell...but it's all good). I like the offbeat humor and I love the music.

It's interesting....and I think I'd put it down as oddly appealing...I feel like for the price I should probably be getting a little bit more...or perhaps the mechanics aren't as well developed as I'd like for them to be at the price point it's at or something like that...but I'm enjoying the game and it's one of those more than the sum of it's parts things that make giving it any kind of objective score tricky...thus the range I gave above (see above).

But yeah I'd recommend it.

. It's very much Mega Man but doesn't quite live up to the highs of that series. Still if you're looking for a game in that vein you can do much, much worse.. The best coaster i have watched ever. Beautiful view and cool impresion. It's a fun novelty to be able to fly in Meigs again. However why would you recreate downtown Chicago with 3d buildings and NOT include O'Hare and Midway?!?!?

. The gameplay, apart from being translated, is left untouched, so the experience is still authentic. Recommended for those who cannot read Japanese and can care less about the missing trains in this release to play this game.

Just keep in mind that many JR trains, amongst more from private Japanese railway companies, are not available in the international release due to potentially inhibiting licensing fees and/or reasons undisclosed by the publisher of the International Release.

On the other hand, for those who can actually read Japanese, know Japan enough to lust for the missing trains, and has enough knowledge to buy the download store version from the ARTDINK online store, BY ALL MEANS GO THERE INSTEAD. More trains are available there and trains from JR Central can be added via the JR Central Addon Pack.
