See also Office Open XML Open XML File Formats Portable Document Format Office Open XML Text Category:Office Open XMLQ: htaccess - current URL to absolute URL I have a form on my website where you can fill-in your email and visit the verification page. The verification page is not the root page, but a subpagetree. I want to add a link in my htaccess file so that visiting the verification page will lead to the verification page, but then also show the page a the given (absolute) URL. I added the following URL rewrite rules, but it seems that it only works if the request comes from one of my subpage. RewriteEngine on RewriteRule ^v/(w+)/?\$ ^v/\$1/index.php [L] Any tips? A: If I understand correctly, you want to "hide" your subdirectory from the address bar f678ea9f9e
